

Royal Oyster is a high quality supplementary maturation feed for shrimp breeders. This maturation diet is a supplement to fresh feeds normally used in shrimp maturation such as squid, Artemia Biomass or polychaetes.

Royal Oyster improves the condition of females and speeds up their recovery after each spawn.

- Preventing denaturation of essential nutrients
- Homogeneous particle size facilitating apprehension by shrimp
- Low leaching preserving water quality in the nursery tanks
- Improving nauplii quality and pigmentation
- Cold-micro-extruded product
- Marumerized product
