OCEAN STAR INTERNATIONAL, INC.

# Black Algae Powder

- Contains Black Powder to Color the Water
- Color Enhancement Promoted by Addition of Spirulina and  $\beta$ -Carotene
- Immune System Stimulated by Spirulin (from Spirulina) and  $\beta$ -Glucans (from Yeast)
- No Antibiotics or Chemical Preservatives

## Available Sizes

500 g / can x 12 cans / case

**Black Algae Powder** is a micro-particulate food made with an assortment of important food-grade quality ingredients. It supplies a rich source of protein, fats, and vitamins. The diet will color the water to reduce cannibalism. A high concentration of spirulina and beta-carotene will promote color enhancement, and the spirulina and yeast will help stimulate the immune system. The diet is suitable for both larval fish and shrimp (mysis-PL). Particle size is about 100 microns. Strong attractants to stimulate rapid-feeding responses are included.

## Feeding Method

Screen diet through a 60-180 mesh net before feeding. Feed 2-6 times per day. Diet can be fed with other diets.
