Rotofier™ is an advanced feed for larval shrimp and fish. It is made from a microencapsulated/microgranulated mix of animal and plant ingredients. A high protein level supports rapid growth. A high fat level provides energy, sparing protein for growth. High fat levels also provide important highly-unsaturated fatty acids (DHA and EPA) for proper development.

Feeding

This feed is for shrimp and fish. Feed 1-7 g of food per 100,000 animals per day. Add water and stir to separate particles. Then spread mixture evenly across the rearing tank surface. Split total feeding into 4-6 times per day.

Storage

Store in a cool, dry place. An oxygen absorber is included to protect from oxidation. The expiration date is listed on the bottom of the can. Once opened, keep refrigerated and use within 6 weeks.

Ingredients

Marine Proteins, Marine Oils, Vegetable Protein Concentrates, Carotene, Vitamins.

Available Size

#1 300 g / can x 12 cans / case

#2 500 g / can x 12 cans / case
